Why F110 ...

- ✓ Industry leading Average Time on Wing
- ✓ Lowest acquisition and lifecycle costs
- ✓ 90% of total maintenance can be completed locally (O+I+D)
- ✓ Only qualified engine on the F-15EX
- ✓ 40 years of uninterrupted production
- ✓ Long-term sustainment & parts availability
- ✓ Continuous technology investment
- ✓ Demonstrated performance growth
- ✓ 600+ 6,000 TAC engines shipped and in service

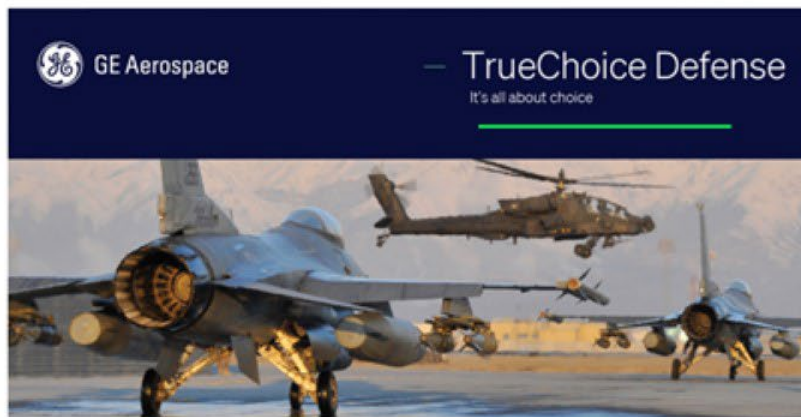

GE Aerospace

GE Aerospace TrueChoice Defense™

TrueChoice Defense accommodates the full range of customer needs and operational priorities with an unmatched depth and breadth of services and support.

- Over 25 long-term service contracts
- Over 20 years of service contract experience
- Supports both Fleet users / local MRO's

TrueChoice Defense™ Sustainment Levels

- ✓ Graduated level of service offerings to meet your specific needs
- ✓ PBL & TLS offerings optimize cost of ownership over engine lifecycle

Total Logistics Support

Total logistics management services utilizing GE Aerospace's Depot network .

Performance Based Logistics

Provisioning, Inventory, Fleet optimization coupled with MRO operations

Material Support Agreement

Proactive forecasting, inventory right sizing, and configuration control

Basic Support

Transactional Spares and Repairs

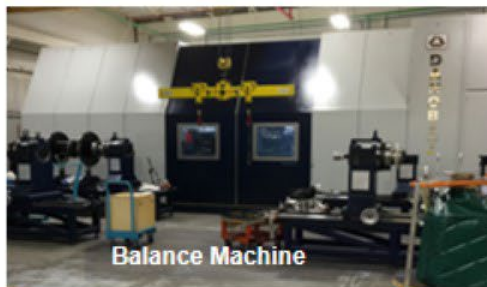

GE Aerospace

GE Strother Field MRO Facility

An OEM provided TrueChoice Defense Solution

Optimized for F110 maintainability architecture

- ✓ Depot services focused on SRU* overhaul, particularly for ENSIP overhaul
- ✓ OEM quality and spare part delivery for improve engine readiness and lifecycle cost

TrueChoice Defense™ Digital Offering

Fleet Advisor

Performance Capability module shows mission readiness
Engine Performance module shows faults by ESN

Fleet Dashboard

Displays key usage and maintenance metrics:

- TAC, EFH, engines affected by TCTO, etc.) by ESN

Engine Tracking Database System (ETDS)

Tracks part numbers, engine configurations, parts life, inspections and time compliant technical orders.
